

LED Slimline Flexible Light

This highly flexible light strip will conform to absolutely any shape, allowing you to design signage without constraints. Revlite Slimline Flexible Light sets the PC board into a flexible copper / silica gel strip adhered onto the side of the LED which accounts for its extreme flexibility. This makes this product the only choice for signage with narrow script or cove lighting. The Slimline Flexible Light naturally has all the LED advantages (100,000hrs lamp life & extremely low power consumption) as well as being waterproof making the Revlite Slimline Flexible Light as the best choice for outdoor cove lighting.

Features:

- 1. Class 4 waterproof
- 2. Flexible PC board built into the side of the LED's.
- 3. Available in many different single colours or different colors mixed in one product.
- 4. 12VAC operating voltage
- 5. Installer Friendly: able to be cut at 3 bulb intervals.

Benefits:

- 1. LED bulb life of 100,000hrs.
- 2. Safe low voltage: 12VAC
- 3. Extremely low energy consumption
- 4. 360° narrow radius bends possible.
- 5. IP44 waterproof for outdoor use

No. of LED	Voltage	Power	Size	Life
99	12V	7.92W	1X7.6X12mm	100.000HRS
