

## LIGHT UP NEW OR EXISTING HOMES WITH *STAR DUST* EXTERIOR LED LIGHTING

Lighting Architects agree that in 10 years, LED lighting will be as common place as incandescent lights are today.

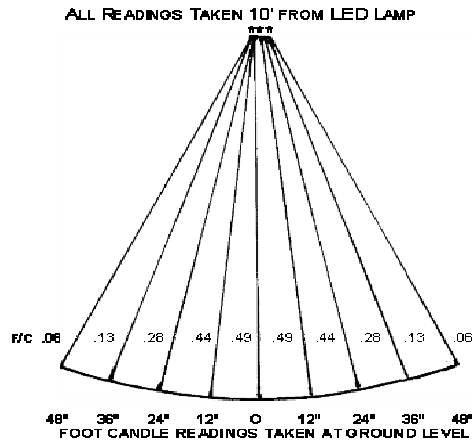

**You don't have to wait...the future is now!**

\* *Star Dust décor lights are easily installed.* They are surface mounted, so no holes to cut or wires to fish. LED's are energy efficient, produce almost zero UV and heat.

\* *Highlight exterior features of homes, decks, patios and walkways year round for only pennies a year!* These LED lights run on safe 12Vdc and consume only .43 watts of power costing only 20 cents per year per fixture and giving 50,000 hours+ of life. The 180 degree pivoting head adjusts to splash light down the wall or straight down. *Star Dust* fixtures can be mounted on the ground, walls and soffits, where extra security lighting may be required.

\* *Built to last!* Stainless steel housing, water tight and replaceable MR16 LED lamps. Coloured MR-16 bulbs\* are available for festive Holiday lighting or special requests.

Star Dust Model 0712

**Lamp** – MR16 with 18 white LEDs

**Voltage** – 12Vdc 35 ma (.42 watts) 128 foot candles

**Housing** – 4 1/4" long (108.3mm)
